

Want to know how to replace six Epipens for about \$100? Or stock an ideal emergency kit for under \$300? How do the new ADA guidelines on oral sedation affect your use of oral conscious sedation? How can you assure you never get into trouble? The new ADA guidelines are very different from our state regulations--How does this affect you giving oral conscious sedation?

What local anesthetic has been involved in at least 3 malpractice cases I have seen and one case of paresthesia on one of my patients? Make your decision with full informed consent. What should you do if you are faced with a case of paresthesia? The Objective - Use science when picking a local anesthetic drug.
