

Dental Implants Delayed Complications & Peri-Implantitis “Diagnosis and Management”

This lecture will discuss the possible delayed complications in dental implants after receiving the restoration. A thorough discussion about post loading complications and peri-implantitis onset and treatment.

Topics to be Covered:

- Treatment plan right to finish the case right.
- Understanding the macrostructures of implants.
- Understanding the microstructures of implants.
- Implant failure: early/delayed!
- Dental implant removal.
- Peri-implantitis, etiology, diagnosis and treatment.
- Maintenance of dental implants.
- Surgical videos showing different peri-implantitis procedures.

Dr. Alan Yassin DDS MS MSD

Dr. Yassin is a dual-trained dentist in both Periodontics and Oral & Maxillofacial Surgery. He attained his dental degree in 2001, and his specialty training in periodontology, along with his Master of Science in oral science from the University of Washington in Seattle, WA.

Dr. Yassin is a Fellow of the International Association of Oral & Maxillofacial Surgeons and a Diplomat of the German Board of Oral Implantology DGZI. He has several publications and articles in refereed and in peer-reviewed journals; he also serves as a reviewer in many academic journals.

Dr. Yassin holds a teaching position at the University of Washington as an affiliate faculty. He is also the Course Director of the Clinical Implantology program of the Washington Academy of General Dentistry, and the President of the Oral surgery, Dental Implants, and Periodontics Academy OSDIPA. He has a private practice limited to periodontics, oral surgery and implant dentistry in Seattle and Everett, WA.
